

AVE Repellent

Concentrate bird repellent

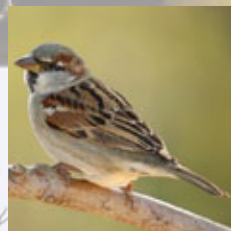

NATURAL CROP PROTECTION AGAINST BIRDS ATTACKS

CHARACTERISTICS

AVE Repellent is a powerful biodegradable product for all types of birds, to be used in places where they land, feed or nest.

The taste and smell is very distasteful to the birds, causing them the displacement from the place of application.

- It easily dissolves in water and can be applied with any traditional spray equipment.
- Does not alter the physiology of the fruit, does not change its organoleptic or aesthetic characteristics.
- There is no risk of residues and other contaminants in the harvest.

APPLICATION AND DOSAGE

For all kinds of birds; sparrows, pigeons, seagulls, swallows, etc.

APPLICATION 4 L/HA

Repellency active period: 7 days.
